He Uttered "Soulmate" Mar 28 2020 God works in mysterious ways. Both in love and in life, in sickness and in health, and in success and in failure,

God is present in our lives, guiding us forward along his path. But do we always listen for his instructions? Do we always stay on the path? And do we always trust in him, even when the circumstances and people in our lives aren't going along as we planned? He Uttered Soulmate tells the story of one woman's journey to stay on God's path even as she struggles with unrequited love from her soulmate. With each revelation she has along the way, author Athena Coleman finds that these interventions are crafted especially for her, and through it all she finds that the utterances of the Holy Spirit communicate divine completeness and fullness. From her early years moving to the Mid-South, becoming a mother, and dealing with her love for Tristan, walk in Athena's shoes as a young woman matures and ultimately finds her second wind in life and in faith. God does not give the spirit of fear, and although the path he sets before us can seem scary or uncertain, the destination holds a happiness and fulfillment that only eternity in the Lord can provide. He Uttered Soulmate reminds us to listen for the words and guidance of the Holy Spirit, so that we too can enjoy our destinies.

Life Cycle Assessment in Industry and Business Nov 04 2020 1.1 Life Cycle Assessment (LeA): a fascinating and sophisticated tool The greening of the economy is not a new task, but it is a challenge for which a lot of tasks still have to be done. It is known that the main source of environmental deterioration by industry is not any more the chimneys and other process related emissions, but the products and services produced. Products are regarded as carriers of pollution: they are not only a potential source of pollution and waste during their use; they are also a cause of resource depletion, energy consumption, and emissions during their life starting with the extraction of the raw materials and ending with their disposal (i.e. connecting production and consumption stages). The challenge of these decades is now the greening of products and services. The new focus on products (cp. Oosterhuis/Rubik/Scholl 1996) was introduced as a policy approach of shared responsibility in which different actors are involved along the life-cycle of a product,

each having specific responsibilities.
