The stories collected here are by leading authors of the short story form in the Middle East today. In addition to works by writers already wellknown in the West, such as Idwar al-Kharrat, Fu'ad al-Takarli and Nobel Prize winner Najib Mahfuz, the collection includes stories by key authors whose fame has hitherto been restricted to the Middle East. This bilingual reader is ideal for

students of Arabic as well as lovers of literature who wish to broaden their appreciation of the work of Middle Eastern writers. The collection features stories in the original Arabic, accompanied by an English translation and a brief author biography, as well as a discussion of context and background. Each story is followed by a glossary and discussion of problematic language points. 'Recommended' CHOICE Language policies are increasingly acknowledged as being a necessary component of many decisions taken in the areas of the labor market, education, minority languages, mobility, and social inclusion of migrants. They can affect the democratic control of political organizations, and they can either entrench or reduce inequalities. These are the central topics of this book. Economists, philosophers, political scientists, and sociolinguists discuss – from an interdisciplinary perspective – the distributive socio-economic effects of language policies, their impact on justice and inequality at the national or international level, as well as the connection between language choices and an inclusive access to public services. The range of social and economic issues raised by linguistic diversity in contemporary societies is large, and this requires new approaches to tackle them. This book provides new input to design better, more efficient, and fair language policies in order to manage linguistic diversity in different areas. Topics covered include: theoretical models of linguistic justice and linguistic disadvantage; the assessment of the socio-economic consequences of language policies; the evaluation of the costs, benefits, and degree of inclusion of language planning measures; the politics of migrants' linguistic integration; as well as multilingualism and economic activities. These topics are discussed in different contexts, including the areas inhabited by linguistic minorities, cities receiving migrants, and supranational organizations. The past few years have witnessed a growing academic interest in Italian Studies and an increasing number of symposia and scholarly activities. This volume originates from the Society for Italian Studies Postgraduate Colloquia that took place at the University of Leicester and Cambridge in June 2004 and April 2005 respectively. It gathers together articles by young researchers working on various aspects of Italian Studies. It well illustrates current trends in both typical areas of research, like literature and 'high culture', and in those which have gained momentum in recent years, like translation and language studies. The volume offers a taste of the dynamic outlook of current research in Italian Studies: the interdisciplinary approach of the essays in translation and gender studies, and the innovative methodological perspectives and findings offered by the new fields of Italian L2 and ethnography. The book is divided into three sections, each grouping contributions by broad subject areas: literature and culture, translation and gender studies, language and linguistics. Cross-fertilizations and interdisciplinary research emerge from several essays and the coherent ensemble constitutes an example of the far-reaching results achieved by current research. When civil war erupts in Somalia, cousins Domenica Axad and Barni are separated and forced to flee the country. Barni manages to eke out a living in Rome, where she works as an obstetrician. Domenica wanders Europe in a painful attempt to reunite her broken family and come to terms with her past. After ten years, the two women reunite. When Domenica gives birth to a son, Barni, also known as Little Mother, is at her side. Together with the new baby, Domenica and Barni find their Somali roots and start to heal the pain they have suffered in war and exile. This powerful yet tender novel underscores the strength of women, family, and community, and draws on the tenacious yearning for a homeland that has been denied. In the first in a new series of brief biographies, bestselling author Peter Ackroyd brilliantly evokes the medieval world of England and provides an incomparable introduction to the great poet's works. Geoffrey Chaucer, who died in 1400, lived a surprisingly eventful life. He served with the Duke of Clarence and with Edward III, and in 1359 was taken prisoner in France and ransomed. Through his wife, Philippa, he gained the patronage of John of Gaunt, which helped him carve out a career at Court. His posts included Controller of Customs at the Port of London, Knight of the Shire for Kent, and King's Forester. He went on numerous adventurous diplomatic missions to France and Italy. Yet he was also indicted for rape, sued for debt, and captured in battle. He began to write in the 1360s, and is now known as the father of English poetry. His *Troilus and Criseyde* is the first example of modern English literature, and his masterpiece, *The Canterbury Tales*, the forerunner of the English novel, dominated the last part of his life. In his lively style, Peter Ackroyd, one of the most acclaimed biographers and novelists writing today, brings us an eye-opening portrait, rich in drama and colorful historical detail, of a prolific, multifaceted genius. Joel, aka 'The Rink' (because his bald patch is shiny enough to skate on),

the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who did kill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected. Pragmatics forms nowadays an integral part of the description not only of modern languages but also of ancient languages such as Latin and Ancient Greek. This book explores various pragmatic phenomena in these two languages, which are accessible through corpora consisting of a broad range of text types. It comprises empirical synchronic studies that deal with three main topics: (i) speech acts and pragmatic markers, (ii) word order, and (iii) discourse markers and particles. The specificity of this book consists in the discussion and application of various methodological approaches. It provides new insights into the pragmatic phenomena encountered, compares, where possible, the results of the investigation of the two languages, and draws conclusions of a more general nature. The volume will be of interest to linguists working on pragmatics in general and to scholars of Latin and Ancient Greek in particular. Sicily has been at the crossroads of the Mediterranean for thousands of years. As close to Africa as it is to many parts of Europe, and directly astride major sea routes, it has been a convenient landfall for both merchants and warriors. Its invasion in the year 827 A.D. by Muslim armies from North Africa set the stage for a fascinating interplay of cultures. As these Arab and Berber soldiers slowly conquered Sicily and extended their reach to parts of the Italian mainland, they came in contact with, and for some two hundred years ruled over, Greek-speaking Orthodox Christians loyal to the Byzantine emperor in Constantinople, Latin-speaking Christians obedient to the pope in Rome, and small but significant communities of Jews. As the fortunes of attackers and defenders ebbed and flowed, fortresses and castles surrendered, cities and towns changed hands repeatedly, and local populations found themselves subject to first one and then another ruler, sometimes in quick succession. Despite the often brutal violence, victors and vanquished managed an uneasy accommodation in which different languages, multiple religions, and several ethnicities could coexist. Adding themselves to this mix, groups of Norman mercenaries arrived in southern Italy early in the eleventh century. They quickly found employment with one or another of the local Latin-speaking Longobard princes who were in constant conflict with each other and who also had to contend with a Greek-speaking Byzantine empire that was trying to expand its territory on the Italian mainland. The descendants of Viking raiders who had settled in the French province of Normandy, and kin to those who invaded England under William the Conqueror in the year 1066, these Normans, or Norsemen, were fierce fighters and soon began to accumulate power and influence in the Italian south. Muslims remained in control of Sicily, but the Normans saw their prospects improve with the arrival of Robert de Hauteville, a military leader of great energy and ability known to history as Robert Guiscard, or Robert the shrewd one. With his younger brother Roger, later known as the Great Count, he eventually conquered Sicily and large parts of southern Italy. Roger's descendants Roger II, William I, and William II ruled in Sicily as kings until the late twelfth century. Very sympathetic to Muslim culture, in their dress and in their tastes they were more like Oriental potentates than European monarchs. Served by a civil bureaucracy largely staffed by Muslims that drafted documents in Latin, Greek, and Arabic, these Normans presided over a monumental building program that produced some of the most breathtakingly beautiful mosaics and building interiors in the world. Incorporating both Christian and Muslim motifs, these emphasized their divine right to rule as well as the luxury and magnificence of their court, in a style and manner meant to echo imperial Byzantium and the splendor of the East. The Council of Europe released a preliminary version of the Manual for Relating Language Examinations to the Common European Framework of Reference for Languages (CEFR) in 2003. Over the next 5 years a wide range of institutions and individuals undertook case studies to pilot this draft version. Towards the close of the piloting phase, a two-day colloquium was held in Cambridge, UK enabling practitioners and academics to reflect on and share their experiences of applying the Manual procedures. Insights from this colloquium informed the Manual revision project during 2008/2009. This volume features selected case studies presented at the Cambridge Colloquium in December 2007. They include the linking of a single test to the CEFR, the CEFR-linking of suites of examinations at different levels and large scale national projects undertaken by examination boards and specialist research institutes. Some studies focus on part of an examination, while others involve all test components. Some apply one or two of the procedures - familiarisation, specification, standardisation, and empirical validation. As well as describing their studies and reporting their findings, contributors reflect and comment on their experience of using the draft Manual. A clear and comprehensive introductory chapter explains the development of the CEFR and the draft Manual for linking tests, and discusses its relevance for the future. The volume will be of interest to examination boards, language test developers and educational policy-makers, as well as academic lecturers, researchers and graduate students interested in the principles and practice of aligning tests to the CEFR. DIVThe creation of language tests is—and should be—a craft that is accessible and doable not only by a few language test experts, but also by many others who are involved in second/foreign language education, say the authors of this clear and timely book. Fred Davidson and Brian Lynch

offer language educators a how-to guide for creating tests that reliably measure exactly what they are intended to measure. Classroom teachers, language administrators, and professors of language testing courses will find in this book an easy and flexible approach to language testing as well as the tools they need to develop tests appropriate to their individual needs. Davidson and Lynch explain criterion-related language test development, a process that focuses on the early stages of test development when the criterion to be tested is defined, specifications are established, and items and tasks are written. This process helps clarify the description of what is being measured by a test and enables teachers to give input on test design in any instructional setting. Informed by extensive research in criterion-referenced measurement, this book invites all language educators to participate in the craft of test development and shows them how to go about it.

Migration represents one of the key issues in both Italian and European politics, and it has triggered EU-wide debates and negotiations, alongside alarmist and often sensationalist news reporting on the activities of government, party and social movement actors. The Politics of Migration in Italy explores what happens when previously undiscussed issues become central to political agendas and are publicly debated in the mass media. Examining how political actors engage with the issue of migration in electoral campaigning, this book highlights how complex policy issues are addressed selectively by political entrepreneurs and how the responses of political actors are influenced by strategic incentives and ongoing events. This book studies the dynamics of the politicization of the immigration issue across three local contexts in Italy – Prato, Milan and Rome – which differ systematically with respect to crucial economic, cultural and security dimensions of immigration. Offering an innovative exploration of party competition and migration in Italy, as well as providing the conceptual and analytical tools to understand how these dynamics play out beyond the Italian case, this book is essential reading for students, scholars and policymakers working in the areas of migration studies, agenda-setting and European politics more generally. An introduction to the art of the film, emphasizing an aesthetic approach. Objective is to teach any student how to analyze any film by using the various analytical methods outlined in the book. Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on language users, the ‘people.’ Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy, whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think “out of the box” and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and languaging on individual language users rather than on the masses. 1058.30 This book explores the contexts, processes and products that comprise the disciplines of SLA and foreign language learning. It offers various perspectives on how SLA and foreign language learning come together as fields of inquiry and to suggest how foreign language teaching benefits from research in language learning. Observing filmic product translation from multiple perspectives is the challenging subject of this volume, which opens up new ways of reading and sustaining dialogue on both theoretical and didactic levels. Its central focus is an observation of European and Oriental languages, gathering together reflections on English, French, Spanish, German, Portuguese, Russian, Arabic, Chinese and Japanese, as well as

specific languages for hearing-impaired Italians, also analysed in their relation to Italian language and culture.
The work focuses on audiovisual language, investigated in the linguistic and cultural dimensions and includes different genres: from election campaign commercials to short films, from animation films produced in the U.S. to Japanese anime, from classic musicals to television series, and finally European and extra European art-house films. Moreover, the volume assembles contributions concentrating both on the oral aspects dedicated to the study of the socio-cultural dimension (e.g. essays on diachronic and diastatic variations in Spanish films, also analysing specific dubbing problems) and on the written dimension represented by interlinguistic subtitles examined in their relationship with the original spoken text (e.g. German films). In the future, it's possible to live forever—but at what cost? A.D. 2088. Christian missionary Abigail Caldwell emerges from the jungle for the first time in her thirty-four years, the sole survivor of a mysterious disease that killed her village. A curious message from her grandfather leads Abby to America, only to discover a nation where Christianity has completely died out. But a larger threat looms. The world's leading artificial intelligence industrialist has perfected a technique for downloading the human brain into a silicon form. Brain transplants have begun, and with them comes the potential of eliminating physical death altogether. As Abby navigates a society grown more addicted to stimulating the body than nurturing the soul, she and Creighton Daniels, a historian troubled by his father's unexpected death, become unwitting targets of powerful men who will stop at nothing to further their nefarious goals. Hanging in the balance—the spiritual future of all humanity. In this fast-paced thriller, startling near-future science collides with thought-provoking religious themes to create a spell-binding "what-if?" novel. While research into aspects of standardised language tests is growing, the area of classroom-based language assessment (CBLA) is still not well-defined and relatively under-researched. Studies investigating CBLA practices within the ESL/EFL school contexts as well as the tertiary level have stressed the need for further research as the picture is not yet complete. The volume aims to address this challenge by presenting a wide scope of research interests that discuss theoretical and practical underpinnings of CBLA. It is also meant to promote the notion of CBLA for a wide membership of the language teaching and testing community covering topics that consider both realities and prospects of CBLA in the assessment world. The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov's arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought. "This book problematizes the construct of distance second language learning, in order to see what it covers, if its parameters are well-defined, what theories can guide the actions of the participants, and whether a model of action can be suggested with a method to validate the model"—Provided by publisher.
