1 the act or process of simulating 2 a sham object counterfeit 3 a the imitative representation of the functioning of one system or process by means of the functioning of another a computer simulation of an industrial process b examination of a problem often not subject to direct experimentation by means of a simulating device simulation is used as an alternative to testing theories and changes in the real world which can be costly simulation can measure factors including system cycle times throughput under different loads resource utilisation bottlenecks and choke points storage needs staffing requirements effectiveness of scheduling and control systems simulation noun uk
?s?mj??le?? ? n us c a situation or event that seems real but is not real used especially in order to help people deal with such situations or events in a simulation if a simulation is the imitation of the operation of a real world process or system over time 1 simulations require the use of models the model represents the key characteristics or behaviors of the selected system or process whereas the simulation represents the evolution of the model over time often computers are used to execute the simulation simulations ensure your students are practice ready with our realistic hands on clinical simulation products that enhance skills competency critical thinking and clinical judgment

our simulation offerings address all stages of your students learning from pre clinical preparation to post clinical debriefing simulation 1 imitation or enactment as of conditions anticipated 2 the act or process of pretending feigning 3 an assumption or imitation of a particular appearance or form counterfeit 4 the representation of the behavior or characteristics of one system through the use of another system esp using a computer apr 1 2021 space is to our universe what numbers are to the simulated reality in any computer matter moving through space can simply be seen as operations happening on the variable space if matter is moving imitation or enactment as of something anticipated or in testing the act or process of pretending feigning an assumption or imitation of a particular appearance or form counterfeit sham computer simulation is the process of mathematical modelling performed on a computer which is designed to predict the behaviour of or the outcome of a real world or physical system the reliability of some mathematical models can be determined by comparing their results to the real world outcomes they aim to predict computer simulations have become a useful tool for the jul 22 2022 from the time it entered popular consciousness many have noted that simulation theory is essentially a modern offshoot of plato s allegory of the cave
